~~SECRET~~ NOFORN-SKEET CHANNELS ONLYPROJECT SUN STREAK (U)WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

## CRV Session Procedures Report (S/NF/SK)

Control Number	: 8701
Date of Session	: 12Mar87
Date of Report	: 12Mar87
Source Identifier	: 021

3

1. (S/NF/SK) Tasking: Per ops officer, monitor was directed to collect more indicators. No other change in tasking. Monitor has been granted access to complete tasking packet; original monitor tasking data sheet attached. Monitor is aware of the location of this site and nature of the intelligence questions surrounding it.

2. (S/NF/SK) Session: Monitor slightly biased with regard to what a function of this site may be (atmospheric heater) based on 11 March 87 CRV session (same source, #021). Intent of session was to "position" source so as to be able to perceive the overall function/purpose of this site. Unencrypted coordinate (in encrypted format) was used as cue. Source was not informed, nor was she consciously aware, that she had worked this same site yesterday until about two-thirds of the way into the session. Source once again had no problem acquiring site and maintaining contact but seemed to be more susceptible this session to AOL. Monitor introduced the word "operations" and "purpose" and, at one point in the session, told the source that she "was now on her own, and must answer the intel question alone, because the monitor simply did not know what else to go after."

3. (S/NF/SK) Summary: In S1 source perceived a white, hard, dense, thick, solid structure with a circular, open component. Several smaller structures are "inside" (see source sketch, p. 5). This site has a "scientific ambience"; recording and measuring equipment are present. Intangibles perceived were "gathering place, survivable atmosphere, Noah's Ark feeling" -- (AOL-"fully self-sufficient society). Also, "experimental, very regimented, controlled, closed in and isolated" -- (AOL-"like a place to hide or escape to"). Source had a feeling that "this is a place where, regardless of political convictions, the greatest minds in all walks of life are gathered and sheltered from an impending disaster so that there will be a continuance when the dust has

cleared". [Note: Looks like AOL drive]. Source was directed to revisit the idea of "heating the atmosphere", particularly the "purpose" (introduced). Perceptions were "radiating heat, creating a layer of warm air, cleansing, barrier, sealing in (prior emanations: "layering, protecting bubble and atmosphere)". Overall impressions: (See significant sketch on p. 13) Site is a large, circular, enclosed area; isolated, with many smaller structures inside. There is a (AOL-"protective") layer of heat being generated above and around the site.

4. (S/NF/SK) Feedback: Source was informed that feedback would be provided as soon as it becomes available.
